### **DETAILED ACTION**

This Office Action is in response to the Amendment filed on November 06, 2004. Applicant's cooperation in correcting the informalities in the drawing and specification is appreciated. Applicant's arguments, see Pages 7-11, filed November 06, 2004, with respect to the Rejections of claims 1-3, 5-10 and 12 have been fully considered and are persuasive. The Rejections of claims 1-3, 5-10 and 12 have been withdrawn.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: None of the cited prior art alone or in combination teaches the claimed combination of a turbocharged internal combustion engine having an exhaust gas recirculation system including:

*"capacity of the turbine being set such that in a high speed and high load region of the engine operating state, if the exhaust gas is supplied to the turbine with the EGR valve closed, the turbocharger overruns beyond a maximum speed limit, and if the EGR valve is opened to return some of the exhaust gas to an intake passage side, the turbocharger rotates at lower speed than the maximum speed limit."*

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
